

AKSHIT CHAUDHARY

Full Stack Developer · MERN · Next.js · TypeScript · AWS · CI/CD

akshtduhn@gmail.com · +91 86079 98882 · Noida, India

[LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building production-grade web applications using the MERN stack and Next.js. Proven track record shipping SSR/SSG frontends with React Hooks, Redux, and Context API; designing secure REST and GraphQL APIs with JWT authentication; implementing Redis caching and WebSocket real-time features; and running CI/CD pipelines via GitHub Actions. Hands-on with AWS EC2, Docker, Nginx, PM2, and Jest testing in live environments. Comfortable in Agile/Scrum teams — available to join immediately.

CORE TECHNICAL SKILLS

Frontend	React.js (Hooks, Context API, Redux), Next.js (SSR / SSG / ISR), TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Axios, React Router
Backend	Node.js, Express.js, GraphQL (Apollo Server), REST API Design, JWT Authentication, Redis (Caching & Sessions), Socket.io, Middleware, Microservices
Database	MongoDB, Mongoose, Aggregation Pipelines, Indexing Optimisation, PostgreSQL, SQL, Data Modelling, CRUD Operations
DevOps	AWS EC2, Docker, Nginx, PM2, GitHub Actions (CI/CD), Linux (Ubuntu), Auto-Scaling, Production Monitoring, API Gateway
Testing	Jest, React Testing Library, Unit Testing, Integration Testing, TDD, Postman, OpenAPI / Swagger, Load Testing
Practices	Git, GitHub, Agile / Scrum, System Design, RBAC, OWASP Security, Code Review, Performance Optimisation, Accessibility (WCAG)

PROFESSIONAL EXPERIENCE

Full Stack Developer — Indiasgo, Noida

Jul 2025 – Present | Onsite

- Built and deployed full-stack features using Next.js, React.js, Node.js, Express.js, and MongoDB — end-to-end ownership across multiple production releases.
- Improved page load speed by 35% through lazy loading, dynamic imports, and React.memo on Next.js SSR/SSG frontends.
- Reduced DB load by 40% by designing RESTful and GraphQL APIs (Express.js / Apollo Server) with JWT auth, Redis caching, and strict request validation.
- Improved MongoDB query performance by 30% by introducing proper schema indexing and aggregation pipelines.
- Cut production errors by 35% by writing Jest and React Testing Library unit and integration test suites.
- Optimised Next.js bundle size by 25% via code splitting and lazy loading; maintained GitHub Actions CI/CD pipelines for zero-downtime deployments.

Full Stack Developer & DevOps Engineer — Dr. Mudhiwalla, Delhi

Jan 2025 – Jul 2025 | Onsite

- Architected MERN + Next.js application serving 100+ concurrent users with 99.5% uptime on AWS EC2.
- Built Next.js SSR dashboard with Socket.io real-time updates and RBAC for multiple user roles.
- Reduced API response times by 45% on high-traffic routes using a Redis caching layer; developed 20+ REST and GraphQL endpoints with JWT auth middleware.
- Reduced MTTR by 40% through proactive Jest test coverage and custom performance dashboards.
- Configured Nginx reverse proxy, PM2 process manager, Docker containers, and GitHub Actions pipelines for automated deployments.
- Boosted SEO organic visibility by 45% through Next.js SSR, structured data markup, and meta tag strategy.
- Managed AWS EC2 infrastructure with auto-scaling, load balancing, and production monitoring.

Software Developer Intern — SS Technology Limited, Dehradun Jul 2024 – Sep 2024 | Onsite

- Built management application features using React.js frontend and Node.js / Express backend with MongoDB CRUD operations and Mongoose validation.
- Integrated REST APIs using Axios and async/await patterns; identified and resolved production performance bottlenecks via Jest unit testing.

KEY PROJECTS

Real-Time Booking & Payment Platform *Next.js · Node.js · GraphQL · MongoDB · Redis · Socket.io · AWS · Docker*

- Engineered full-stack booking platform with 50+ monthly active users and 99.5% uptime — Next.js SSR for SEO; GraphQL / Apollo Server reduced over-fetching by 60%.
- Implemented Redis session caching and high-frequency query caching, cutting DB load by 40%; Socket.io WebSockets drive real-time booking status and live notifications.
- Jest test suite with 80%+ coverage across API endpoints, React components, and business logic; deployed via Docker + Nginx + PM2 + GitHub Actions pipeline.

Corporate E-Commerce Platform *Next.js · Node.js · MongoDB · PostgreSQL · AWS EC2 · CI/CD*

- Built responsive Next.js e-commerce platform with SSR product catalog, search, filtering, cart, and checkout — page load time cut by 40% using ISR, dynamic imports, and React.memo.
- Dual-database architecture: MongoDB for product catalog, PostgreSQL for order transactions; REST API with RBAC and JWT refresh token rotation.
- Deployed on AWS EC2 with Nginx reverse proxy, PM2 cluster mode, GitHub Actions CI/CD pipeline, and automated Jest testing suite.

EDUCATION

B.Tech — Computer Science Engineering

Roorkee College of Engineering, Roorkee, Uttarakhand

Coursework: Data Structures & Algorithms, OOP, DBMS, Web Technologies, System Design, Computer Networks, Microservices Architecture

CGPA: 8.5 / 10

2021 – 2025

CERTIFICATIONS & TRAINING

- Full Stack Web Development (MERN + Next.js) — Smartbrains Technologies Pvt. Ltd., Noida
- Data Structures & Algorithms in C — Spoken Tutorial, IIT Bombay
- DSA using Java — NPTEL
- Industry Certification in IT — L&T Edutech
- Front-End Developer Training — Eduskills
- JavaScript & TypeScript — Udemy
